Driver Training Services | Consulting Services | Managed Services | Fleet Technology

*We Protect People and the Businesses They Run™*

**J. J. Keller**  
& Associates, Inc.®  
Since 1953

## Are Your Trucks on the Road in Canada?

Whether your fleet is based in Canada or you're a US-based company that transports into Canada, you need to **ensure that your drivers and vehicles comply with the countless Canadian-specific provincial/territorial and federal National Safety Code (NSC) standards.**

We can help.

J. J. Keller, a leader in safety & compliance, has the industry- and Canada-specific regulatory expertise you need to improve safety on the road and simplify the complexities of regulatory compliance. Our diverse solutions — from professional services to fleet technology — are trusted by more than 500,000 companies across North America.

### Trust J. J. Keller to...

- ◆ Keep your drivers and vehicles safe and qualified to operate in Canada
- ◆ Minimize fines and litigation
- ◆ Prevent accidents and save lives
- ◆ Help you comply with all transportation regulations
- ◆ Increase your operation's efficiency by handling time-consuming tasks
- ◆ Lower workers' compensation expenses

### Areas of Canadian Compliance Expertise

- ◆ ELD Mandate
- ◆ Hours of Service
- ◆ Driver Qualification
- ◆ Driver & Trainer Training
- ◆ Intra-Provincial Regulations
- ◆ Commercial Motor Vehicle Compliance
- ◆ Transportation of Dangerous Goods (TDG)
- ◆ Cross Border Transportation

J. J. Keller® Fleet Safety & Compliance Solutions for Canadian Operations

## Driver Training Services

The J. J. Keller® **Safe & Smart® Training** curriculum, which includes online courses, classroom instruction, and range and road experience, provides **comprehensive finishing training for drivers who have already completed Canada's baseline Mandatory Entry-Level Training (MELT)**. We can even train your internal trainers to deliver this proprietary curriculum in-house. These hands-on programs are delivered by Canadian regulatory experts who speak both English and Canadian French.

### Canada Driver Training Program

Our in-depth training covers everything from vehicle inspections to defensive driving, post-accident procedures, applicable Canadian regulations and more. Plus, our instructors can train your drivers on vehicles ranging from tractor trailers to tank trucks, reefers, motorcoaches, flatbeds, light-duty vehicles and more.

### Canada Driver Trainer Certification Program

Transform your staff into highly skilled trainers with the industry's most in-depth, hands-on, company-specific trainer certification from instructors with decades of experience. Our Canadian regulatory experts will develop your staff into highly qualified trainers of professional drivers who need Canada-specific finishing training, refresher training or coaching.

# Consulting Services

Get the in-depth, hands-on expertise you need from a J. J. Keller consultant. Our extensive team of experts can **go onsite to your locations, identify compliance gaps, recommend corrective actions, review your files and help you improve management practices.** By making them an extension of your safety team, you're able to leverage their extensive industry experience and turn to them whenever you need help.

## Safety & Compliance Programs

Our unique model delivers ongoing support from a veteran transportation consultant working directly with you to assess your risk, develop a customized plan to mitigate that risk, then provide the insights and resources to deliver the results you need.

## Advisory Services

Gain an objective, third-party perspective for managing the complexities of regulatory requirements and best practices in Canada. We can provide guidance for areas ranging from safety program development to mergers and acquisitions, regulatory interpretation and more.

## Audits & Assessments

Our proprietary audit and assessment services deliver an objective review of your policies, procedures, roles and responsibilities. We'll identify your risk areas, tell you which ones require the most attention and explain how to make improvements that show good faith in the event of an audit or litigation.

## Policies & Procedures

Solidify your compliance program by having a J. J. Keller consultant offer guidance in writing, maintaining and enforcing compliant policies and procedures for all aspects of your fleet operation.

## Consultant-Led Training

Our consultants are also highly skilled trainers who can train your drivers and supervisors on specific regulatory topics customized specifically for your unique situation. This training can be delivered onsite, via the web and even on a subscription basis.

## We Can Protect Your Workplace, Too

If your company has facilities in Canada, we can also help you manage workplace safety and meet applicable Canadian regulatory requirements. Our environmental, health & safety (EHS consulting) services include:

- Safety Program Management
- Safety Audits & Assessments
- Advisory Services
- Consultant-Led Training
- Industrial Hygiene Services
- Chemical Management

# Managed Services

Let our team of Compliance Advisors **manage your fleet's regulatory recordkeeping, audit it for accuracy, identify areas of noncompliance and provide guidance for reducing risk.** Then use our online DataSense® platform to curate your company's safety and compliance data and present it using intuitive dashboards, so you can pinpoint risk areas, spot trends, clarify priorities and generate custom reports.

## Driver Qualification File Management Service

We help you keep qualified drivers on the road by managing your driver documents (both U.S. and Canadian, if needed) and notifying you of expiring documents. We also audit your documents to the province in which the highest standard for each item exists, ensuring compliance no matter where your drivers travel in Canada.

## Hours of Service Management Service

Get expert compliance guidance based on the hours-of-service data we gather from ELDs, paper logs and time sheets. Our proprietary system collects and aggregates this data and your Compliance Advisor interprets it to provide a holistic view of your drivers' compliance with the Canadian hours-of-service rules.

## Vehicle Title Management Service

Whether you're going through a merger or acquisition, purchasing new trucks and equipment or selling old ones, we'll obtain or remove the proper titles and registrations on your behalf. And with our Canada-wide tag agent network, we expedite the process, so your vehicles are road ready fast.

## Vehicle Tax & Licensing

We make it easy to keep your company compliant with complex motor carrier tax and registration requirements and fuel tax reporting obligations, plus help reduce your audit risk. We'll apply our expertise to ensuring that your vehicles are legal and improving the accuracy and integrity of your fuel and distance tax data.

## Base Plate Renewals

Have your company's new commercial vehicles plated quickly and easily, ensuring they're always up-to-date and accurate. We'll also manage your plate renewals and provide ongoing regulatory support, allowing you to focus on your day-to-day operations knowing your vehicles are operating legally.

EXPERT SPOTLIGHT

### JASON EBINA

J. J. Keller Compliance Advisor – Canada  
Located in Montreal, Quebec

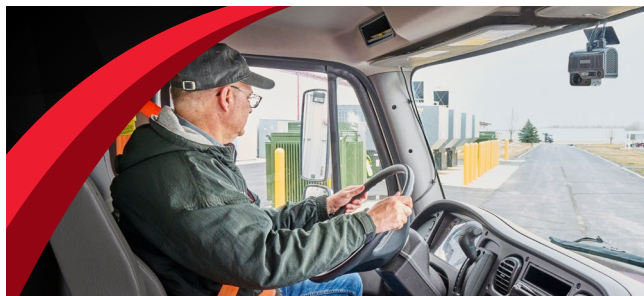

As a member of the Managed Services team, Jason is skilled at helping Canadian companies manage the many time-consuming driver and vehicle compliance tasks.

## Fleet Technology

Put the power of fleet technology at your fingertips with our suite of innovative safety & compliance solutions. Built for growth, they can scale with your operation to **provide exceptional visibility to fleet data for improved operational efficiency and reduced risk.** Ranging from cloud-based fleet management tools to ELDs, dash cams and more, our secure applications will streamline your operation.

### VideoProtects® Fleet Camera System

Identify and address risky driver behaviors quickly with our AI-powered dash cam solution that features video recall, live streaming, live mapping, driver coaching workflow and video scoring. Because it's platform-independent, you can use it in any type of vehicles and alongside any fleet management software with no telematics required. Geotab and Encompass-compatible options also available.
